

# DON'T GET RACKED.™

**BIKES. KAYAKS. ROOF-RACK GEAR.** The HeadsUp System is a new, smarter way to protect them all from getting racked. It's a garage-mounted wireless gear alert system that detects when you return home with gear on the roof. When HeadsUp senses your gear, the system alerts you to STOP – so you don't drive into the garage with your gear still on the roof.
