BIKE CARE GUIDE

CLEAN.

WD-40 BIKE® Biodegradable Foaming Wash

Dirt-eating suds remove the most stubborn grime from your bike, leaving it sparkling clean. Biodegradable and safe for carbon fiber, titanium, aluminum, steel, chrome, rubber or plastic. Doesn't contain citrus or solvents, which can damage components.

Use on:

- Saddle
- Handlebars
- Stem
- Levers
- Frame
- Wheels
- Derailleurs
- Drivetrain
- Pedals

WD-40 BIKE® Heavy-Duty Degreaser

Safely dissolves and removes grease from frames and drivetrains. Thick formula clings to surfaces for effective cleaning. Safe for carbon fiber, titanium, aluminum, steel, chrome, rubber or plastic. Doesn't contain citrus or solvents, which can damage components.

Use on:

- Cassette
- Derailleurs
- Crankset
- Chain
- Pedals

LUBE.

WD-40 BIKE® Dry Conditions Chain Lube

Special petroleum/polymer blend forms a slippery dry film to protect your chain and repel dirt in arid or dusty conditions. It doesn't contain wax which can leave a sticky residue on the drivetrain.

Use on: Chain

WD-40 BIKE® Wet Conditions Chain Lube

Proprietary formulation goes on wet and stays wet as a durable coating that holds up to weather, water, mud and miles. It improves shifting and extends chain life by repelling moisture and gunk.

Use on: Chain

PROTECT.

WD-40 BIKE® Frame Polish

Specially formulated to prevent the build-up of dirt, dust and grime. Helps treated surfaces stay cleaner longer. Restores scratched areas and the luster of clear coats, carbon or other finishes (completely dry matte finishes before applying). Delivers UV protection to prevent sun damage.

Use on:

- Top tube
- Seat stays
- Head tube
- Chain stays
- Seat tube
- Fork
- Down tube
- Bottom bracket shell

WD-40® Multi-Use Product

Still a must for every bike tool chest. Lubricate squeaky shifters, cables, derailleurs and pivot points. Free metal-to-metal seat posts, bottom brackets and bolts. Shed mud from pedals and cleats. Remove adhesive residue and sticky substances. Prevent rust on steel frames and parts.

Use on:

- Sticky gear shifters
- Seized or sticky seat brackets
- Any rusted parts
- Derailleur pivot points
- Pedals/Clips to displace water
